Professional Summary

Full Stack Developer with hands-on experience in building scalable web applications using **PHP, Laravel, and MySQL**. Currently working at Elderberry Tech, developing full-stack and CMS-based solutions using WordPress, OpenCart, and Wix Studio.

Also experienced in **MERN Stack (MongoDB, Express.js, React.js, Node.js)**, with hands-on experience in building modern web applications, REST APIs, and implementing **JWT authentication** and **RBAC**.

Technical Skills

- **Languages:** Java, PHP, JavaScript
- **Backend:** Laravel, REST APIs, Node.js, Express.js
- **Frontend:** React.js, HTML, CSS, Tailwind CSS
- **Databases:** MySQL, MongoDB
- **Full Stack:** MERN Stack (MongoDB, Express.js, React.js, Node.js)
- **CMS/Frameworks:** WordPress, OpenCart, Wix Studio
- **Core Concepts:** OOPS, Data Structures

Professional Experience

Elderberry Tech

Oct 2024 – March 2026

Full Stack Developer

- Developed full-stack applications using **PHP, Laravel, JavaScript, MySQL** and **MERN stack**.
- Built and customized websites using **WordPress, OpenCart, and Wix Studio**, improving functionality and user experience.
- Designed and integrated **REST APIs** and optimized database systems using MySQL and MongoDB.
- Implemented scalable features, handled API integrations, and ensured performance and reliability of applications.

Projects

- **Time Machine (Full Stack):**
 - Built a scalable full-stack application using **Node.js, Express.js, MongoDB, and React.js** with AI-driven historical content generation.
 - Designed modular **REST APIs** and integrated external AI services for dynamic narratives and images.
 - Implemented secure authentication using **JWT** and **RBAC** with dynamic role-based access control.
 - Developed user management system with CRUD operations, file uploads (Multer), and API logging features.
 - Built responsive frontend using **React, Tailwind CSS, Axios** with reusable components and role-based dashboards.
- **Video Streaming Backend (Node.js):**
 - Developed a backend API using **Node.js, Express.js, and MongoDB** for a video streaming platform.
 - Implemented secure authentication using **JWT** with password hashing.
 - Designed **RESTful APIs** for video uploads, subscriptions, and user management.
 - Integrated **Cloudinary** for media storage and **Multer** for file uploads.
 - Structured the application using controllers, models, middleware, and reusable modules for scalability and maintainability.
